**TURN THAT WASTED SPACE
INTO A WONDERFUL PLACE**

Most of us love the idea of having more space for a lot of reasons. Maybe the kids need more room to play (and save the upstairs from becoming a disaster zone). Or when we have people over, there's not enough room (especially during the holidays). We'd love a place for fun (pool table, card parties), or work (home office) or perhaps to work out (fitness center).

It's time to make the
JUMP!

The evolution in superior
GREEN building has arrived

Earth-Friendly engineering meets designer décor for beautiful results

Our Thermal Finishing System is a true industry revolution. Installation is quick, clean, and easy.

The Healthy Way

Moisture and mold are your worst enemies. Our unique materials and installation system solves both problems. They protect your family and your investment.

Why it's Smart

- 100% non-organic
- 100% moisture-resistant
- Solid panels resist allergens and odors

Ingenious Extras

- Elevated base track protects panels from water intrusion
- 2-Way built-in wiring channels make wiring fast
- Removable panels provide access to basement walls
- Hanging bracket self-levels finishing panels
- Invisible seams create "upstairs" wall appearance
- Adjustable base trim removes for wiring access

FOUR EASY STEPS: 1. Evaluation 2. Comprehensive Project Planning 3. Select Décor 4. Install
